

HeatForm® the insulated panel pool that doesn't cost the Earth

HeatForm insulated pool panels are the convenient and eco-friendly way to build a high quality in-ground or above-ground swimming pool in your home, garden, spa or school, whilst helping the planet at the same time.

The modular HeatForm panel system allows you to create a pool to suit your requirements - from exercise pools and domestic pools up to large commercial installations.

The panel system is flexible and easy to install. The panels are available in four lengths (0.5m, 1.0m, 1.5m and 2.5m) with three different height options 0.9m, 1.2m and 1.5m for use both in-ground and above-ground.

Manufactured in Devon, UK with insulation made from 100% recycled PET bottles, HeatForm can reduce your pool's energy usage by up to 50% compared to a traditional in-ground concrete pool.

Make your dream pool a reality, putting exercise, fun and relaxation within easy reach of your lifestyle and budget.

Why HeatForm?

- A HeatForm insulated pool can reduce your pool heating costs by up to 50% compared with a standard concrete pool
- Wall depth options: 0.9m, 1.2m and 1.5m
- No limitations to the pool width or length
- Quick - 10m x 5m pool walls is typically completed in one day
- Easy positioning of flow and return fittings in pre-positioned panel openings
- HeatForm pool panels comply with the Part-L building regulations regarding U-Value requirements
- Made in Devon, UK

"We chose a HeatForm above-ground insulated panel system to replace an ageing school pool as it was simple and quick to install and the insulated panels will provide significant energy cost reductions in the future. The school were particularly impressed with the eco-friendly nature of the panels on top of the heating benefits they will achieve. We received great customer service from Lighthouse Pools and would highly recommend the HeatForm pool system"

Steve Whiteley, Aquafun Sheffield

Simple and effective in design, the HeatForm panel pool system offers an affordable and eco-friendly solution to owning your dream pool..

No more travelling back and forth to the gym or the local pool, now you can relax, train or exercise in the private comfort of your own swimming pool. The beauty of HeatForm is in its flexibility and we are confident that we can provide something for everyone – you set the parameters and we will provide the solution.

Whether in-ground, above-ground, small or large, shallow or deep, the possibilities are endless. As well as traditional designs suited to lane swimming, HeatForm pools can be used as hydrotherapy pools or teaching pools.

The differing depth options cater for the widest range of users from the very young, early swimmers up to most capable professional tri-athletes.

HeatForm is proud of it's heritage.

Manufactured in Devon, UK, the product will help to reduce your carbon footprint by reducing transportation distances
