ABOUT US

Crystal Leisure specialises in high-quality, bespoke GRP mosaic tiled spas, pools, and wellness products for both residential and commercial settings. Based in the UK, our team brings together over 70 years of combined expertise across all areas of swimming pool and spa construction. Every product is built using premium materials and components, with a focus on durability, performance, and precise finish. We offer a fully bespoke service from custom designs and specifications to finishes and fittings, ensuring each project meets the highest standards.

WHY CHOOSE US?

Any Size, Anywhere!

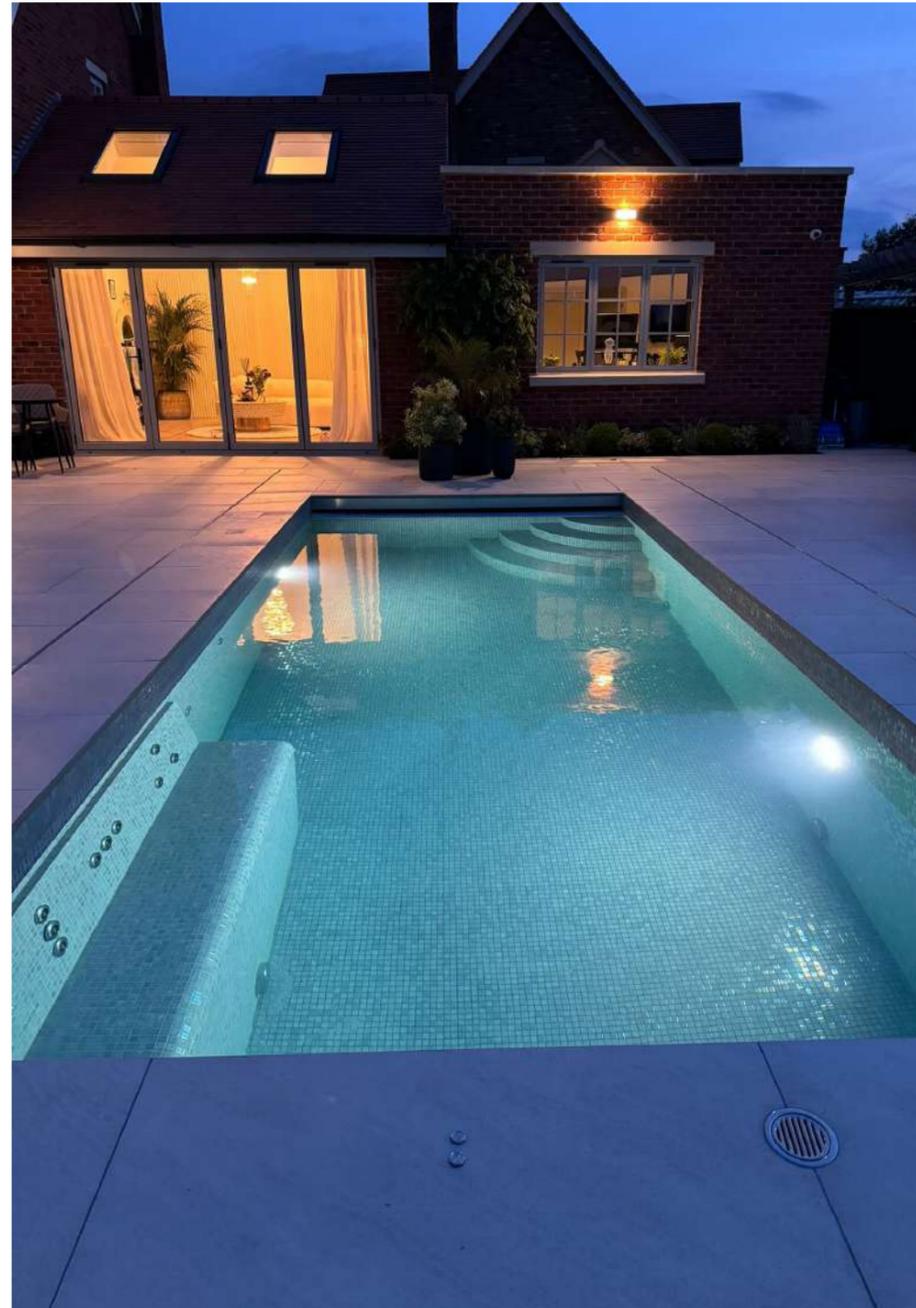

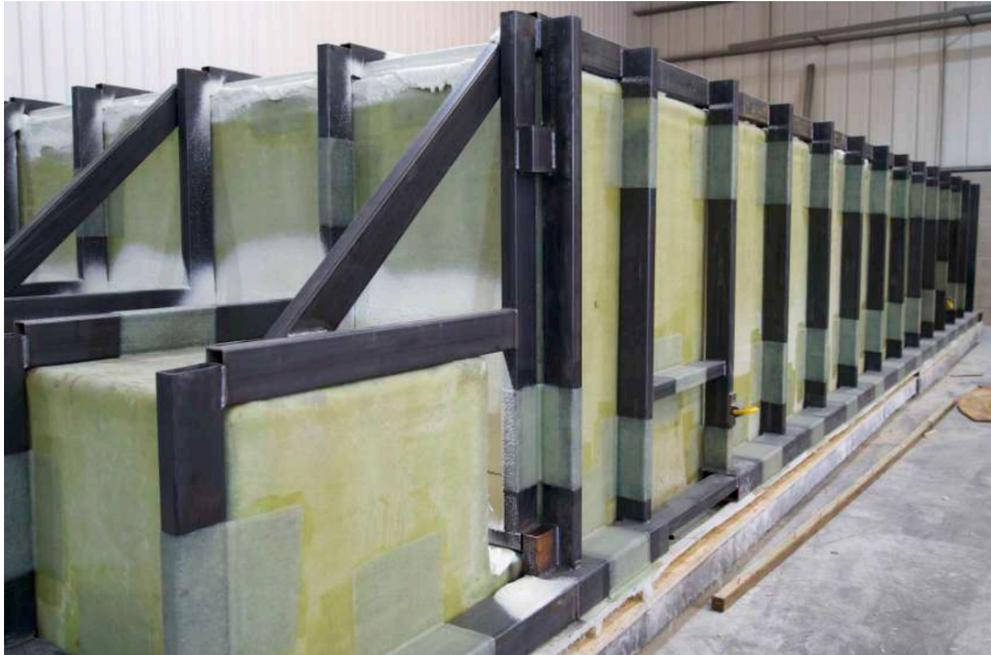

Crystal Leisure's design options are limitless when it comes to design, size, and configurations. Your product can be located in virtually any area, outdoor, indoor or even roof tops.

Design to Install in just 8-10 Weeks!

Project times can be dramatically reduced with GRP products as they're manufactured as a single, seamless shell within a controlled factory environment.

Made in Britain Accredited

All of our pools and spas are manufactured to the highest quality in the UK, and at least 90% of all materials are UK-sourced, enabling us to offer shorter lead times.

WHY CHOOSE A PREFABRICATED ONE PIECE POOL?

Our pools and spas offer an unbeatable combination of speed, strength, and style, making them the ideal choice for today's pool professionals.

Fast Installation: Pre-built in factory conditions, pool arrives ready to install, reducing on-site time and disruption.

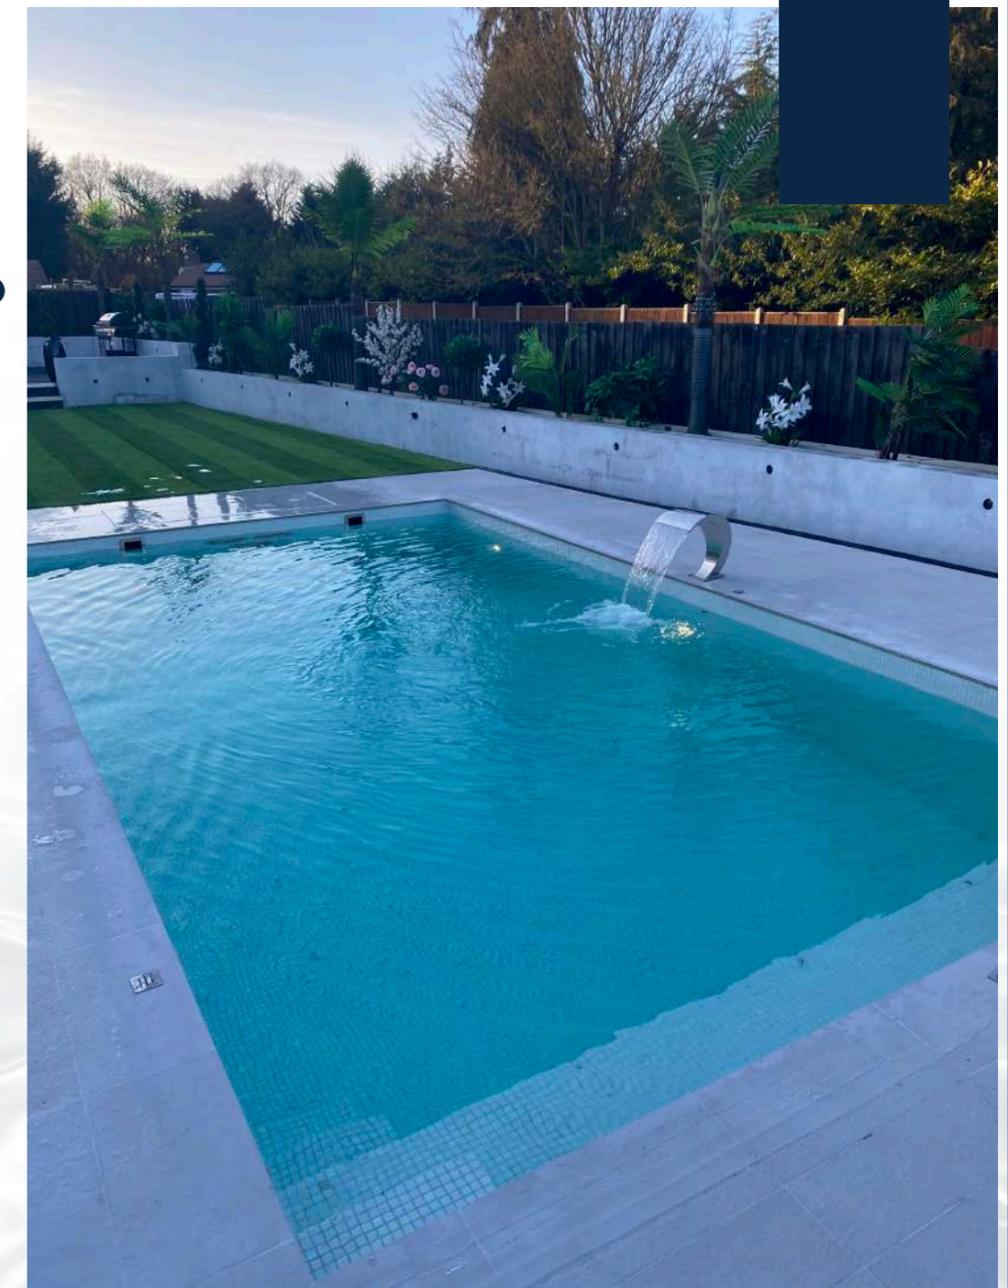

Exceptional Durability: The reinforced structure resists cracks, leaks, and chemical wear, ensuring long-lasting performance with minimal maintenance.

Design Flexibility: Available in a range of sizes and shapes, with bespoke options and additional features to suit any project.

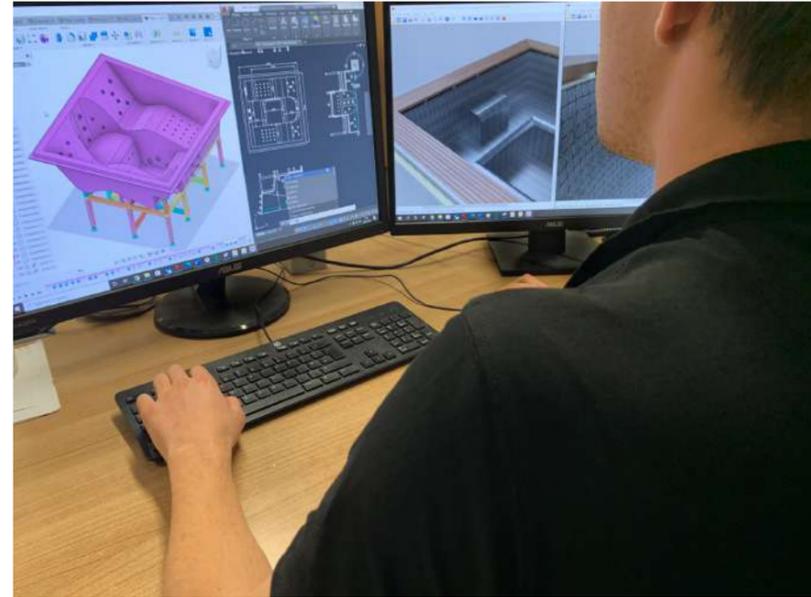

Cost-Efficient: Faster lead times and simpler installation mean lower overall project costs and quicker customer handover.

Factory Water Tested: Every pool and spa is fully water tested before leaving the factory, ensuring structural integrity.

Easy access to fittings: Designed with accessible fittings and pipework, allowing for quicker maintenance and minimal downtime - a crucial advantage in commercial settings.

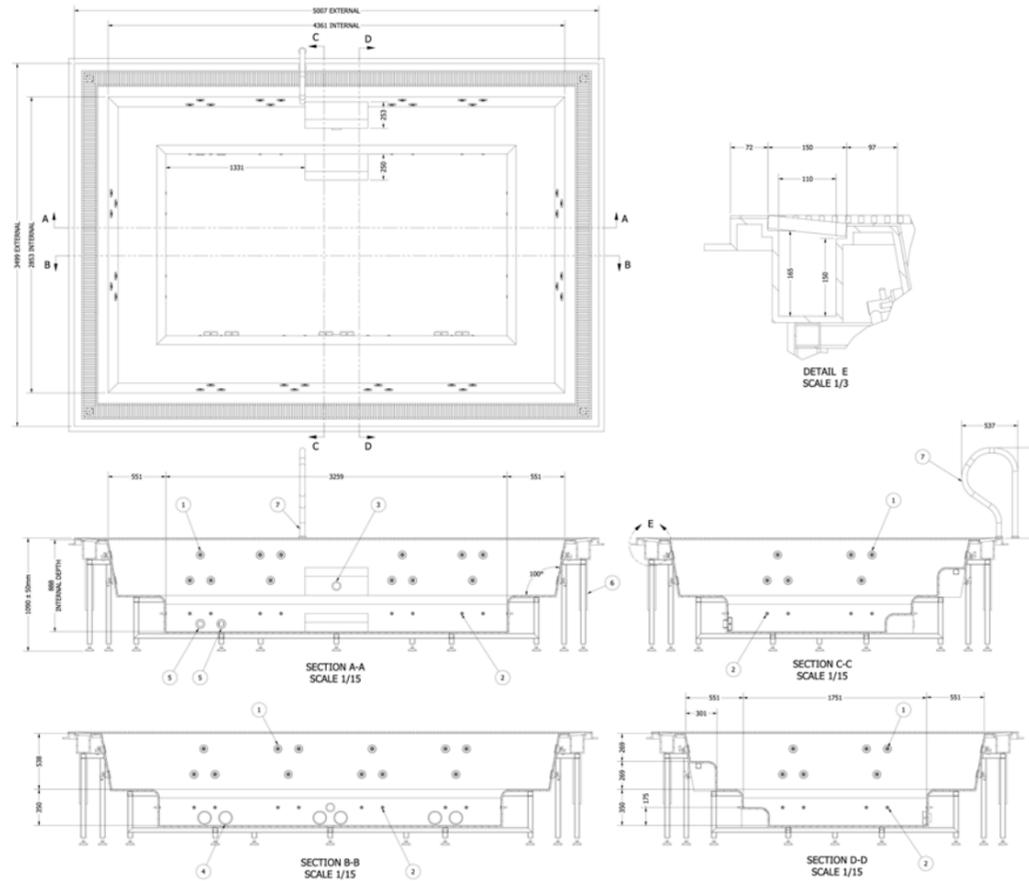

DRAWINGS & RENDERS

Our design team collaborates with you to transform your vision into a reality. Utilising cutting edge design software like 3DMAX, Inventor and AutoCAD, our experts draw, create and animate your project within days of receiving the request.

We deliver precise 2D working drawings, offering an accurate representation of the pools size, fittings, and specifications. Further assistance is provided for on site builders, with concrete and excavation plans.

All our drawings come complete with vivid 3D renderings and immersive walk through videos, giving you a clear realistic preview of what your finished project will look like before construction even begins.

We offer a bespoke design service to help you envision your project and bring your pool to life.

SKIMMER SPA

Skimmer spas, also known as freeboard spas, are named for the innovative skimmer system that efficiently functions as both a drain and a water filter. Typically, the water level in a skimmer spa is set 100mm to 150mm below the spas highest edge, though this can vary based on specific design requirements. This precise water level management ensures optimal functionality and aesthetic appeal.

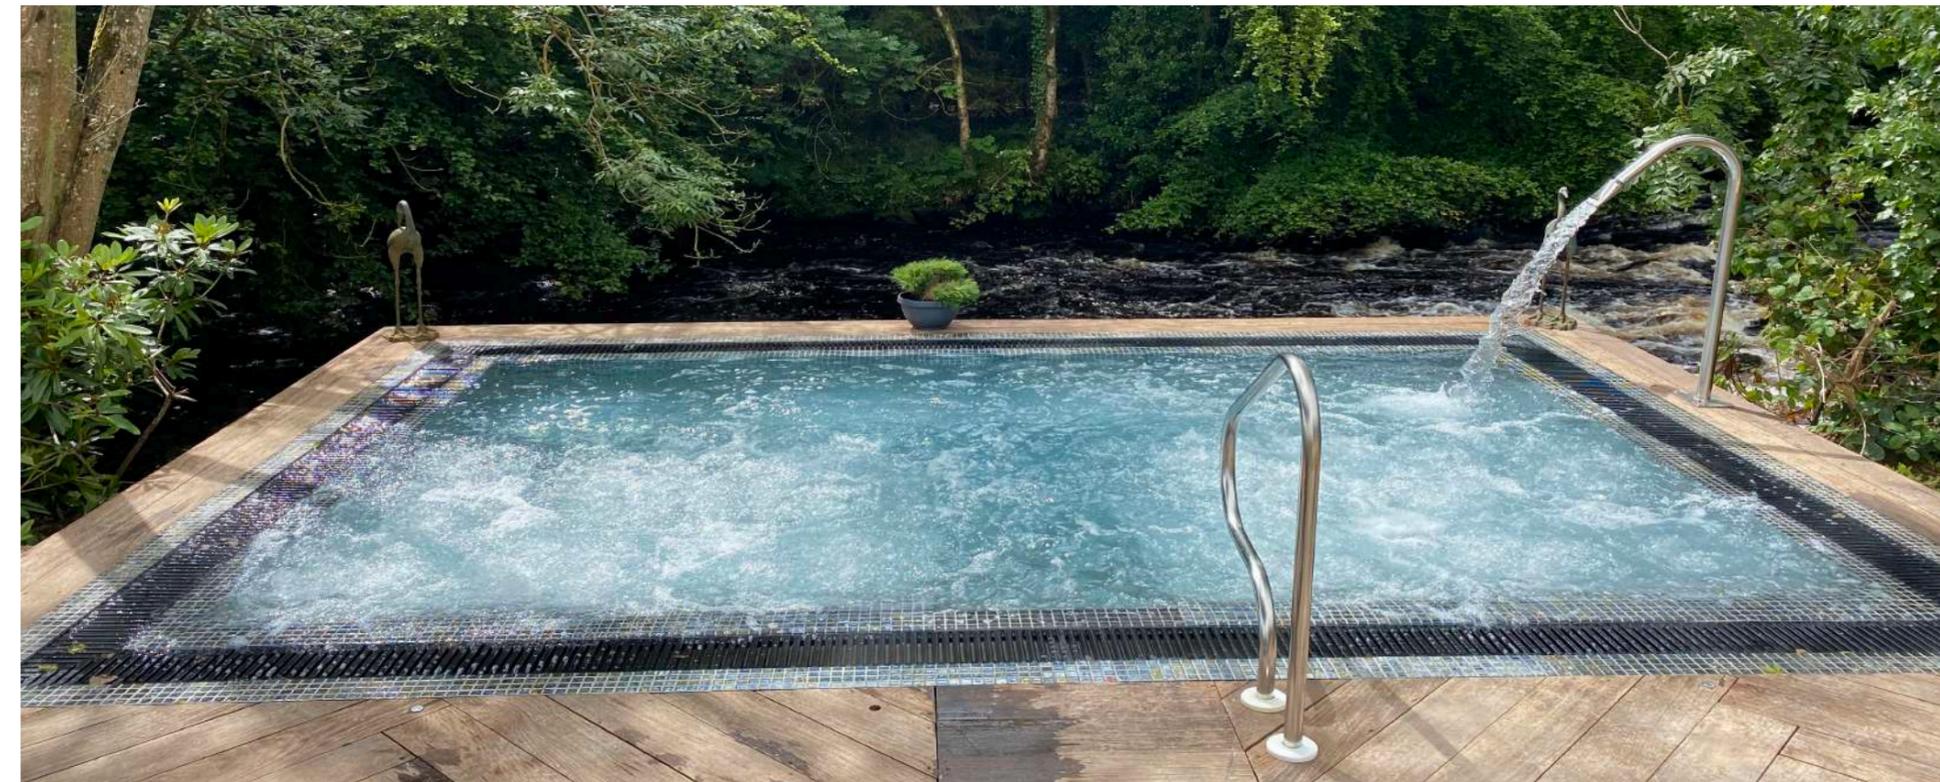

Our mosaic tiled skimmer spas are manufactured to meet each customers exact specification. This customisation allows us to integrate loungers or seating that perfectly matches the curvature and height preferences of the spa users.

DECK LEVEL SPA

A deck level spa, also known as an overflow spa, features a sophisticated design where the water level is flush with the highest edge of the spa, creating a seamless aesthetic. Unlike skimmer spas, deck level spas have an overflow channel that maintains a consistent water level regardless of bather activity.

Deck level spas have a high water turnover rate, with water continuously filtered and recycled. This keeps the water clean and stable, even with multiple bathers, making them popular in the commercial leisure industry.

VITALITY SPA

The vitality spa offers exceptional relaxation with various massage jets for different body areas. Designed with versatility, our mosaic tiled vitality spas offer various seating and lounging options, allowing users to sit, stand, or lounge.

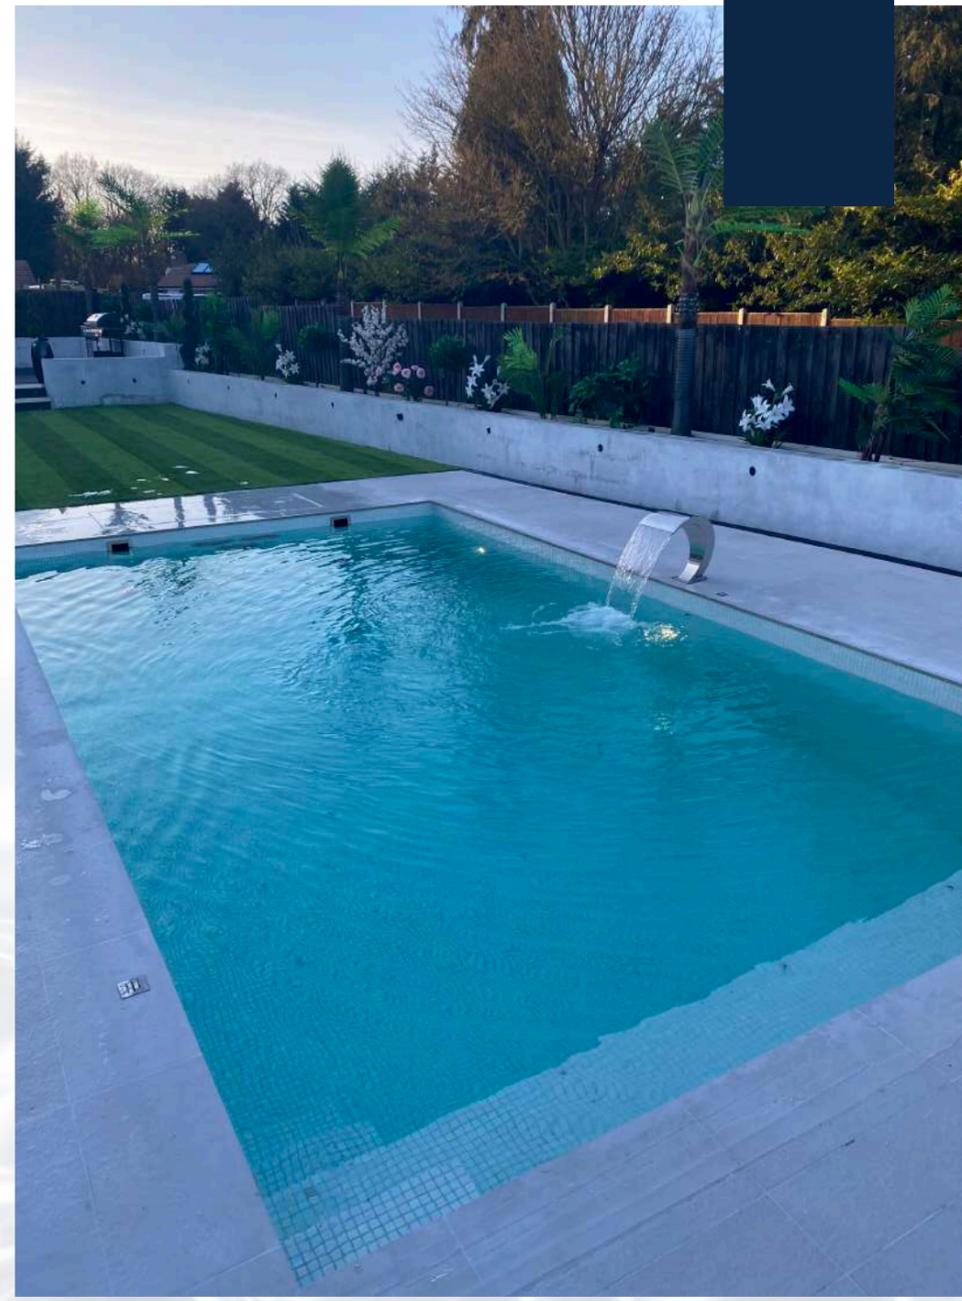

Vitality spas can include unique water features for enhanced tranquillity and aesthetic. These spas can be integrated into any project, with installation options such as skimmer spas, deck level spas or infinity edge spas, catering to diverse design preferences and requirements.

SWIM SPA

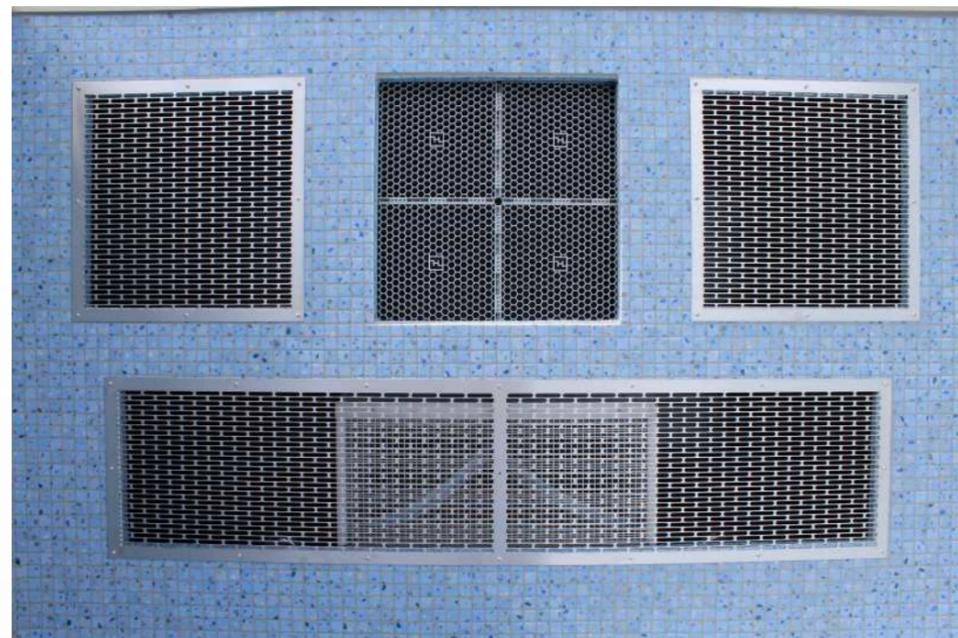

The swim spa offers a versatile solution for both exercise and relaxation. A counter current unit allows for continuous swimming in place, maximising space without needing a full length pool. Typically swim spas include a seated spa section for relaxation, catering to both fitness enthusiasts and those seeking leisure.

Mosaic tiled and available in skimmer, deck level, or infinity edge configurations. The swim spa integrates seamlessly with any existing spa or pool area.

THE CITY POOL

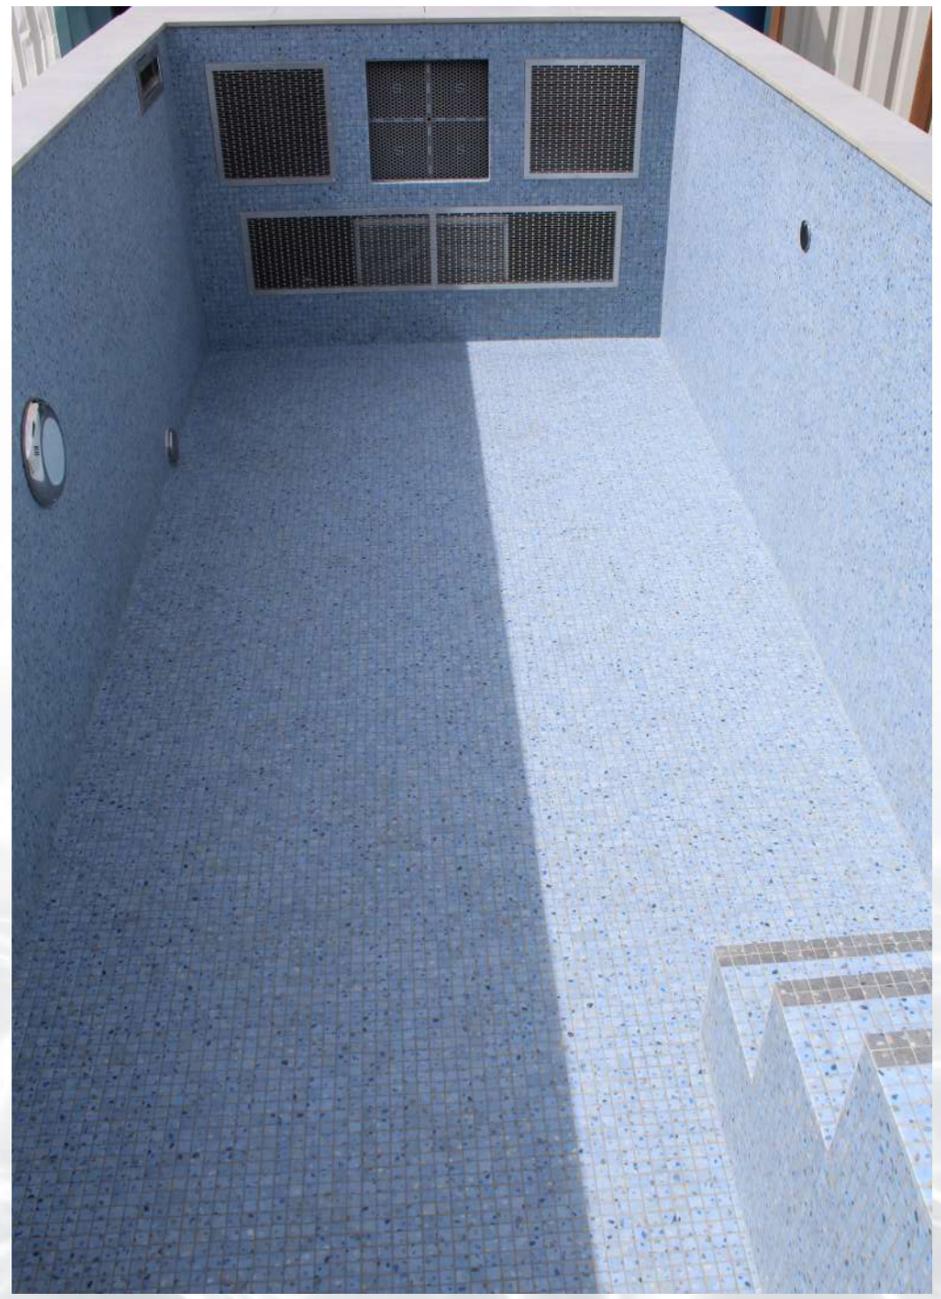

Measuring just **5M x 2M** the City Pool has been cleverly designed to fit into urban gardens, courtyards, or compact outdoor or indoor spaces, without compromising on the experience.

At its heart is the powerful Velocity Swim Jet, powered by a cutting-edge 4kw inverter motor. This advanced system generates a strong, smooth swimming current while being quiet, energy-efficient, and eco-friendly.

The custom designed propeller and flow system deliver a truly natural, open water feel, ideal for fitness, fun or relaxation.

- Choose from a range of bespoke mosaic tiles and surface finishes.
- Compatible with decking, stone, or other exterior designs.
- The City Pool can be made to any size or configuration, including bespoke step options.

PLUNGE POOL

Plunge Pools differ from most other spas and pools as the water temperature is cooler, which offers bathers an invigorating experience. Plunge Pools allow users to transition from a heated spa to a lower temperature plunge pool.

Most Plunge Pools can be designed and built as part of a larger pool or a stand-alone pool. The pool can be configured as a skimmer, deck level, or infinity edge.

SWIMMING POOL

Crystal Leisure provide bespoke, full length, mosaic tiled swimming pools. Our pools can accommodate any shape, size, depth, step and bench configurations. Dependent on your needs you can design a pool with features like interior/exterior spas, sun shelves, or built in lounge chairs, free from the limitations of predetermined moulds. We can incorporate water features such as water cannons, water curtains, air and water jets. Automatic covers with various placement options can also be added.

Combining a traditional concrete pools robustness with a welded steel exoskeleton, our pools hybrid structure ensures durability and longevity.

STANDARD SIZES

5M X 3M / 16'4" X 9'8"
 6M X 3M / 19'7" X 9'8"
 7M X 3M / 23' X 9'8"
 8M X 3M / 26'3" X 9'8"

5M X 3.8 / 16'4" X 12'5"
 6M X 3.8M / 19'7" X 12'5"
 7M X 3.8M / 23' X 12'5"
 8M X 3.8M / 26'3" X 12'5"
 9M X 3.8M / 29'6" X 12'5"
 10M X 3.8M / 32'8" X 12'5"
 11M X 3.8M X 36' X 12'5"

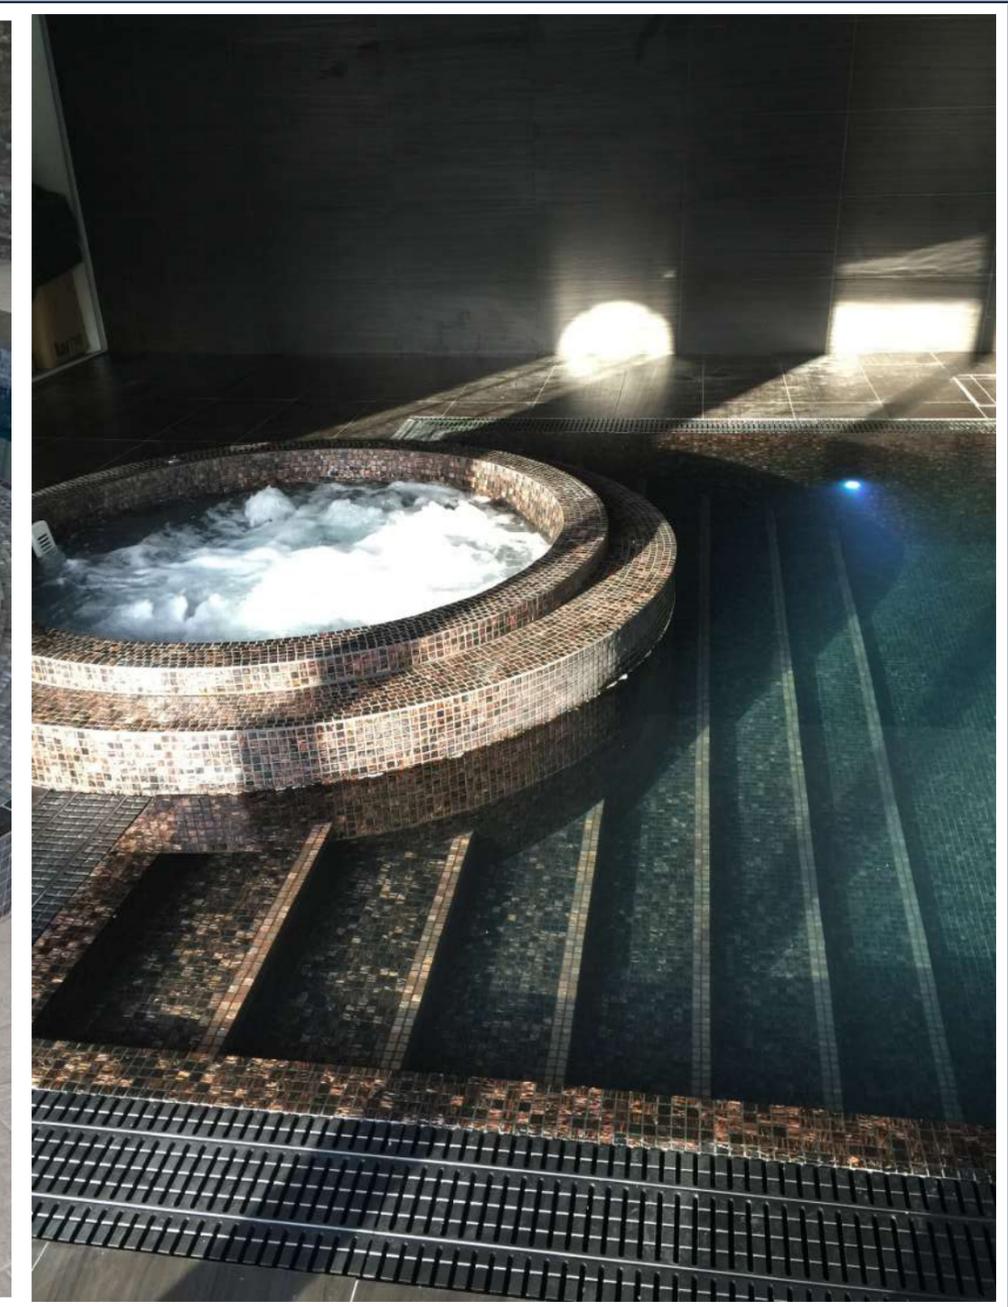

10M X 4.5M / 32'8" X 14'8"
 11M X 4.5M / 36' X 14'8"
 12M X 4.5M / 39'4" X 14'8"
 10M X 5M / 32'8" X 16'4"
 11M X 5M / 36' X 16'4"

All our pools are built with a standard wall depth of 1.5M and a water depth of 1.35M. However, both can be adjusted to meet the requirements of the project.

POOLS WITH INTEGRATED SPAS

Our pools and spas are bespoke, manufactured to fit any configuration and fulfil your unique vision. One of our stand out offerings is a pool with an integrated spa, combining the best of both worlds.

INFINITY EDGE
POOLS & SPAS

INSTALLING YOUR POOL

EXCAVATION

The initial step is excavation of the pool area and the installation of a level concrete slab.

CRANING, POSITIONING AND SETTING

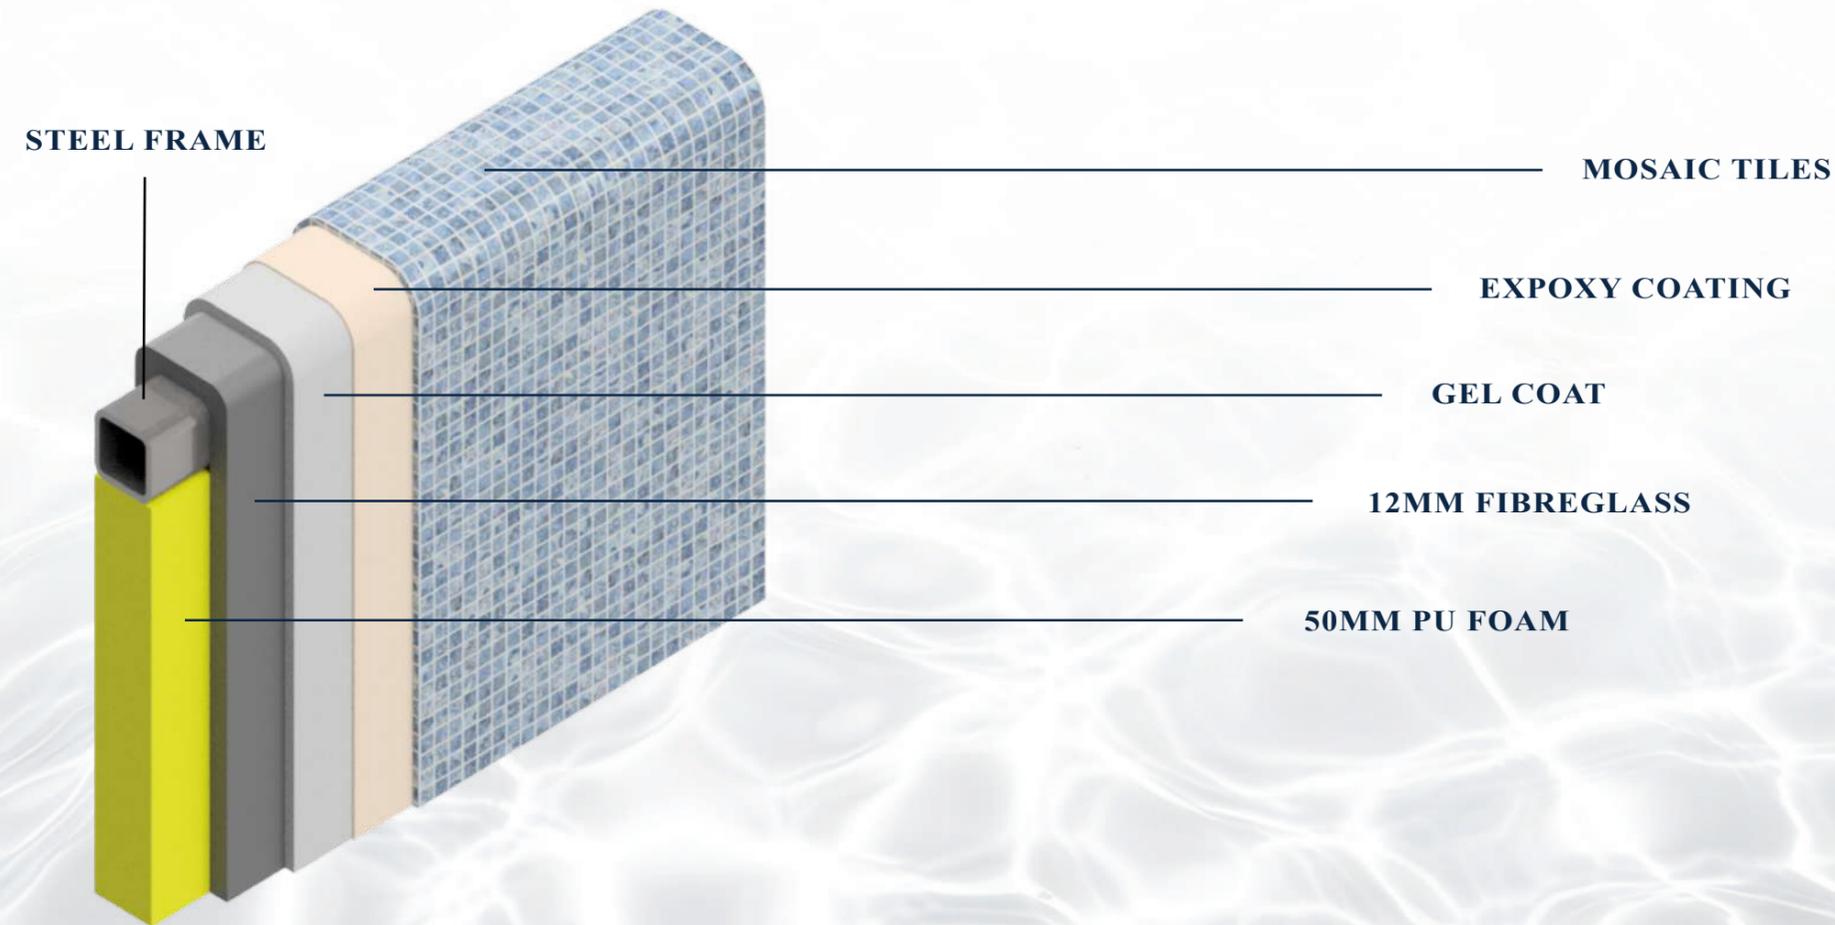

With the foundation in place, we crane your pool or spa into position. Once set, the space between the excavated area and the pool walls is carefully backfilled. Please note one of our engineers will be on site to complete the install.

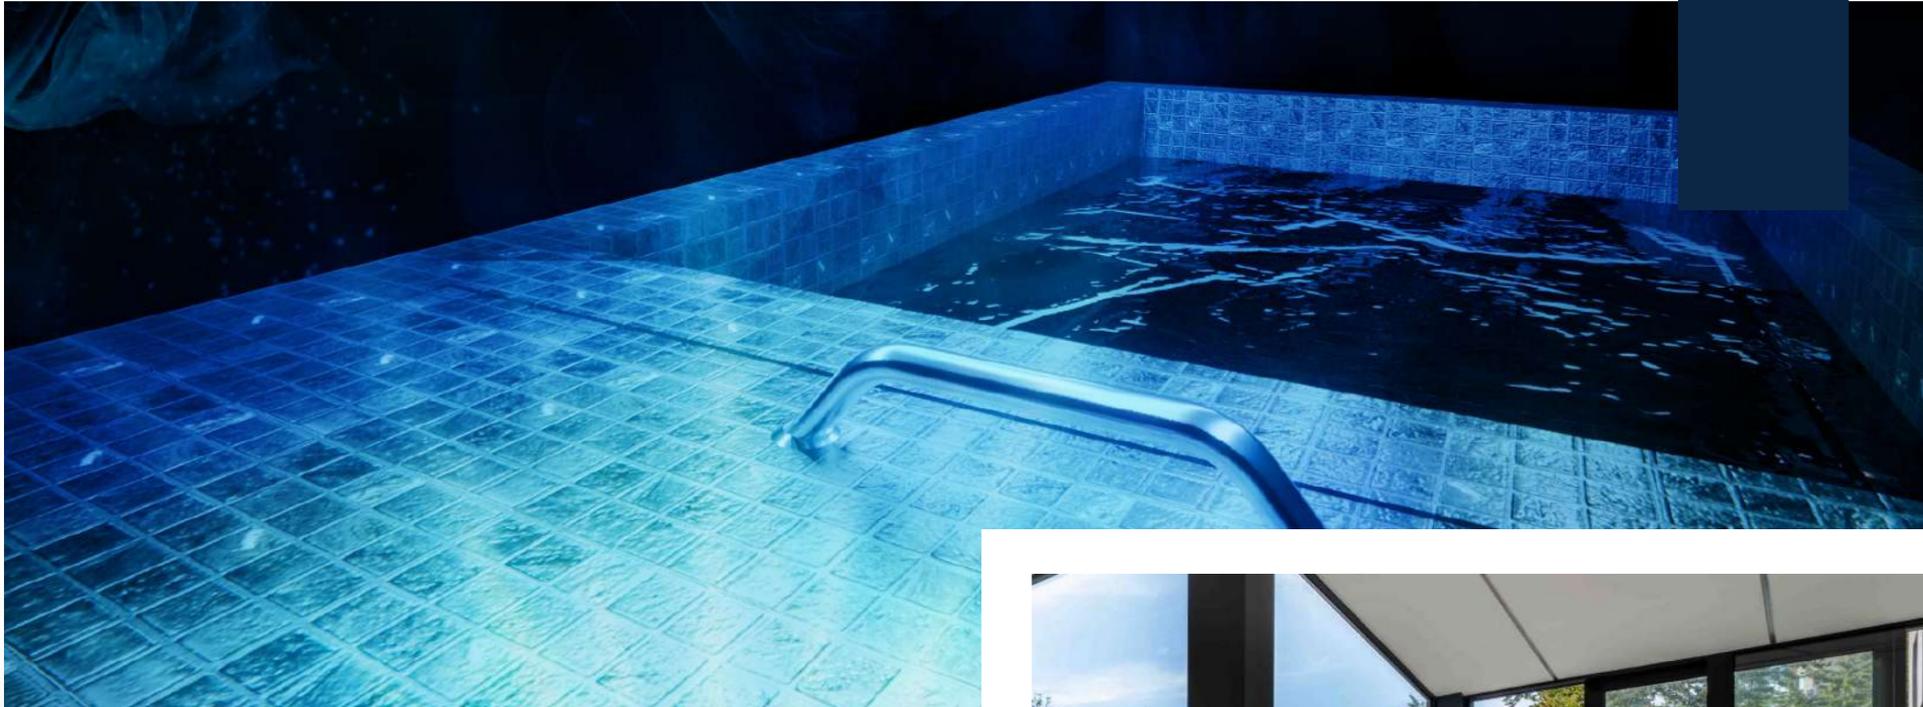

JOINING POOL SECTIONS

For pools or spas that need to be delivered in multiple sections due to site access or size, our engineers will be on-site to complete the assembly. The sections are mechanically bolted together using high-strength adhesive, and the seams are then reinforced with fiberglass and welded, ensuring a seamless, durable structure ready for final tile installation.

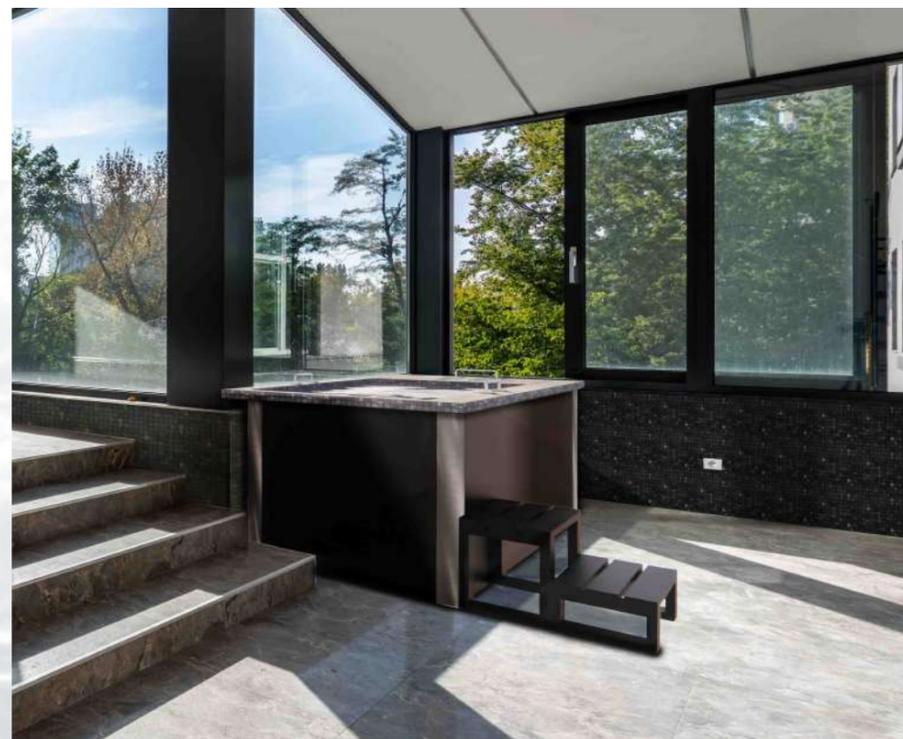

MATERIAL BREAKDOWN

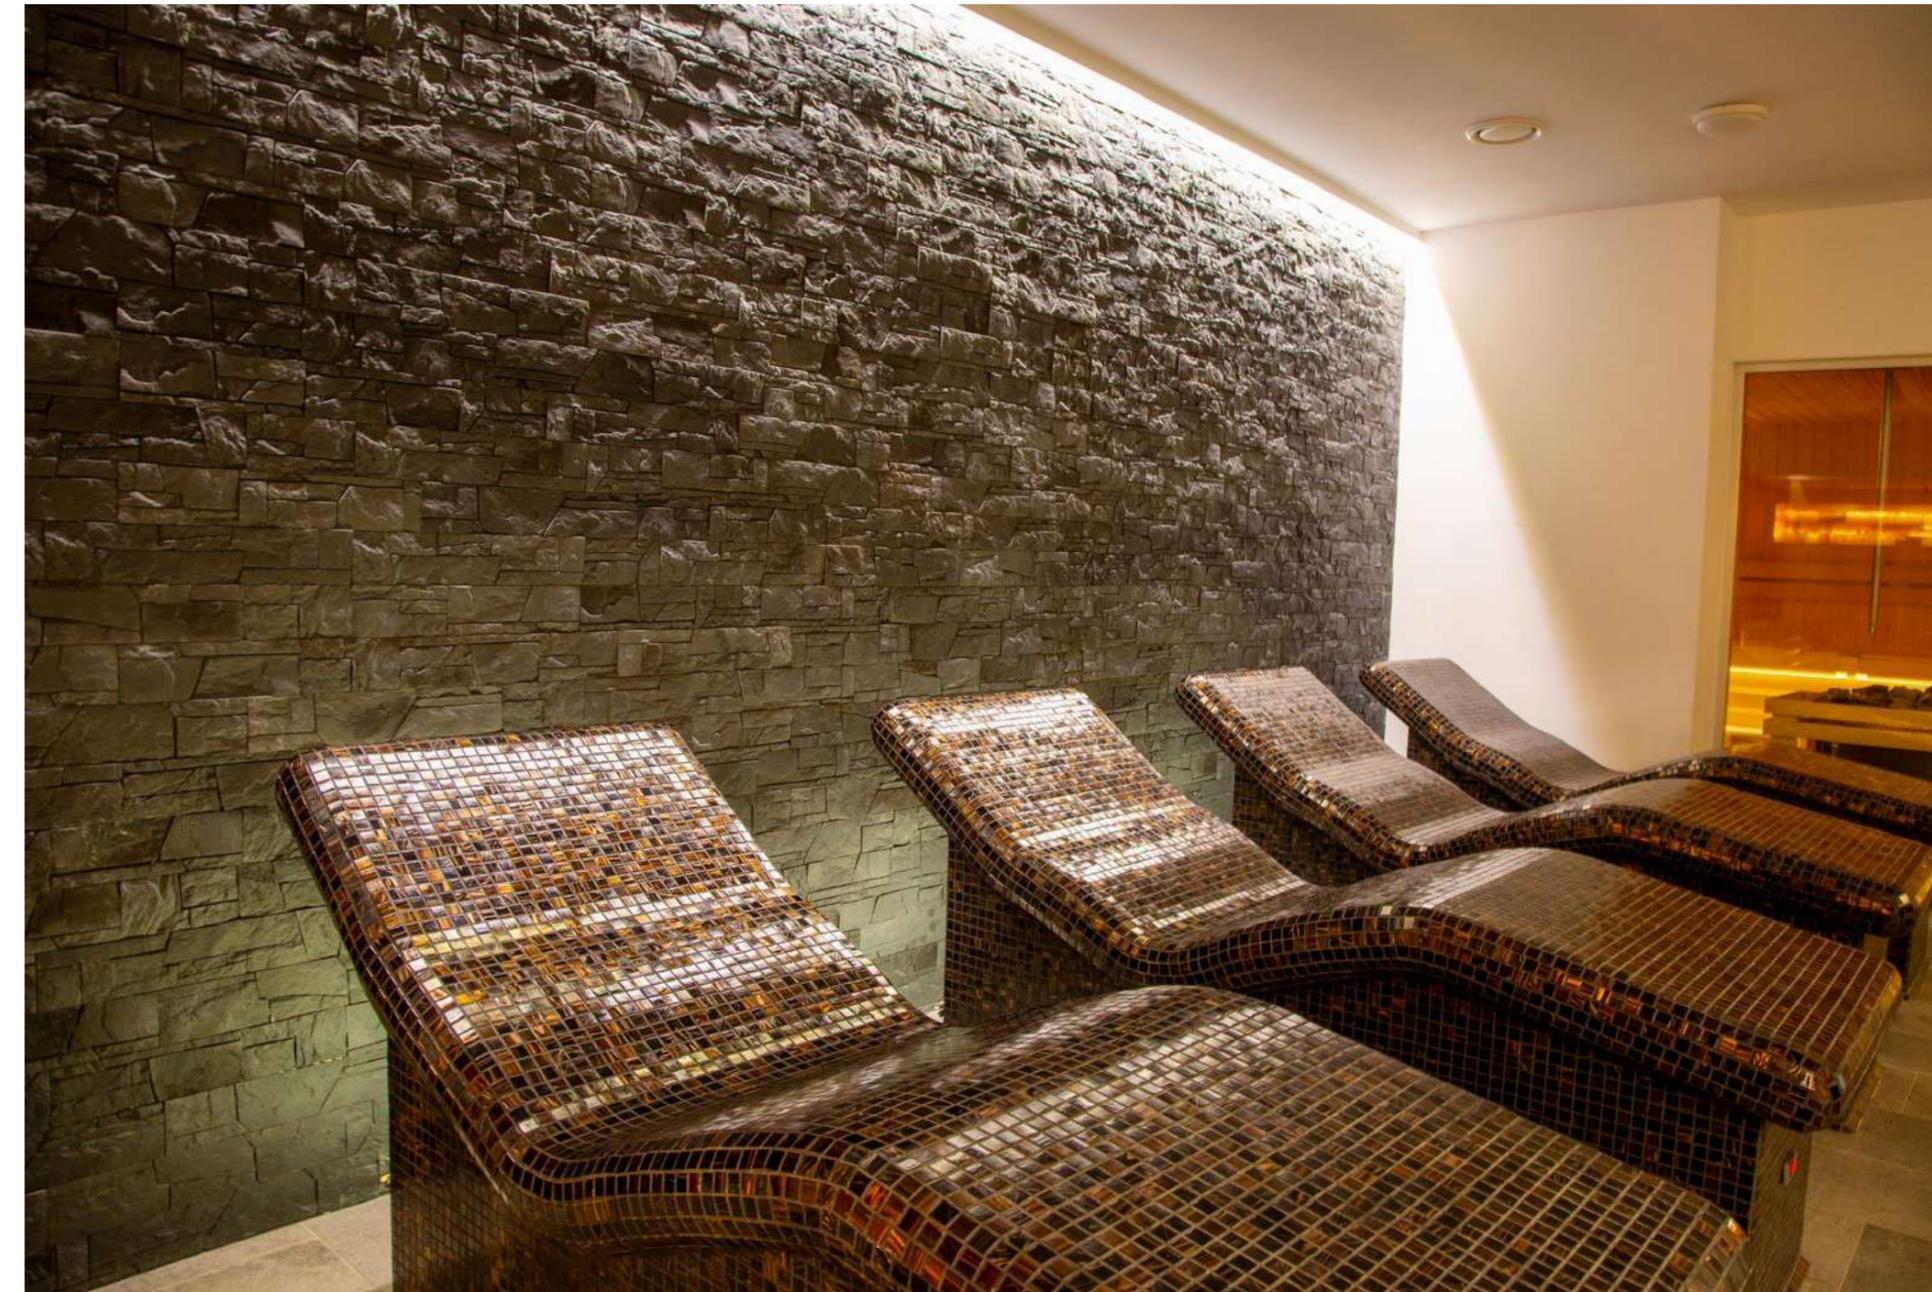

ICE BATH

Discover the ultimate recovery sanctuary with the ice bath from Crystal Leisure. Our ice bath features an advanced built-in temperature control system, capable of cooling water to as low as 3 degrees Celsius (37.4 degrees Fahrenheit). This precision cooling ensures an optimal recovery environment for fitness and health enthusiasts. Included is the choice of mosaic tile finishing.

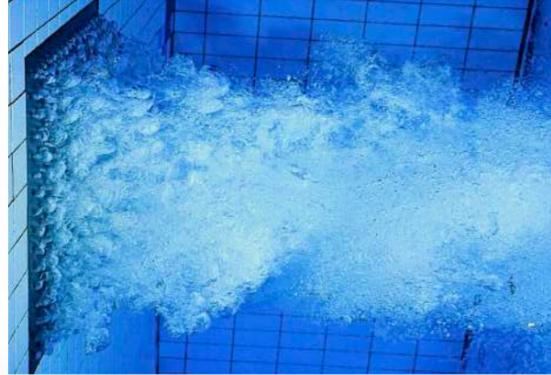

HEATED LOUNGERS

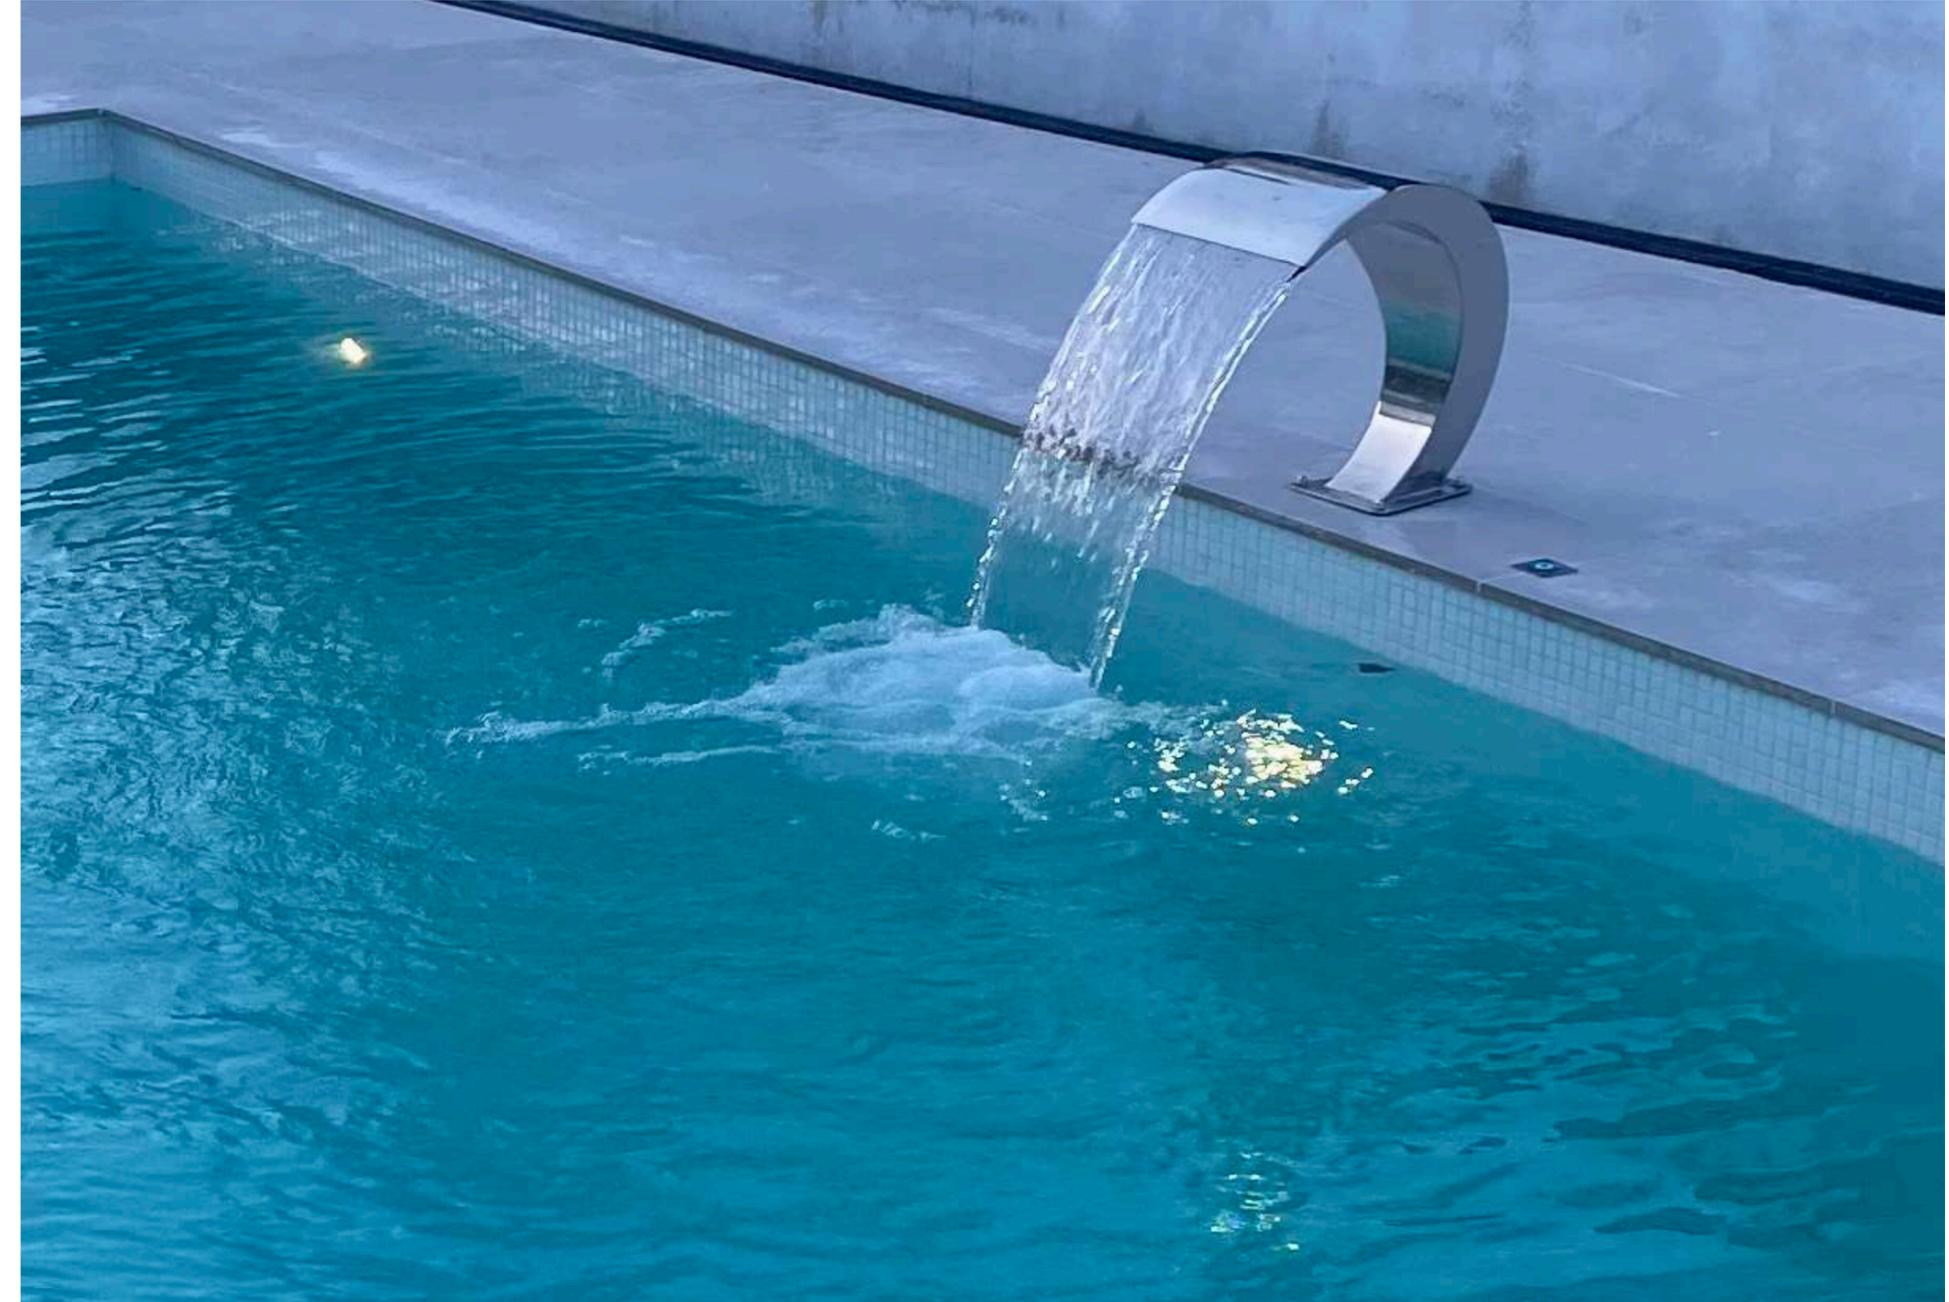

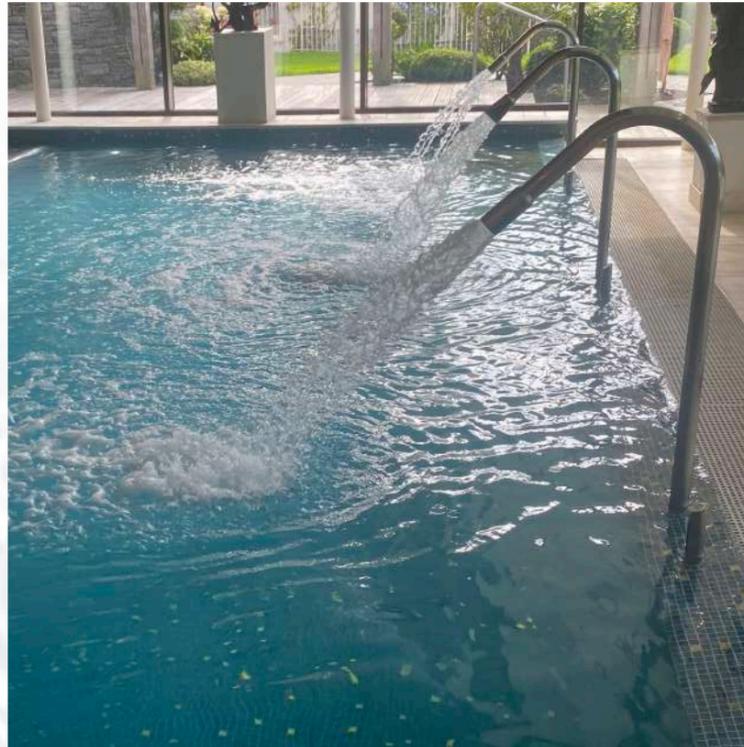

Our heated loungers feature advanced electrical heating systems with mats installed beneath the tiles, ensuring consistent warmth. A thermostatic control system precisely manages the temperature, allowing users to customise the heat to their preferences.

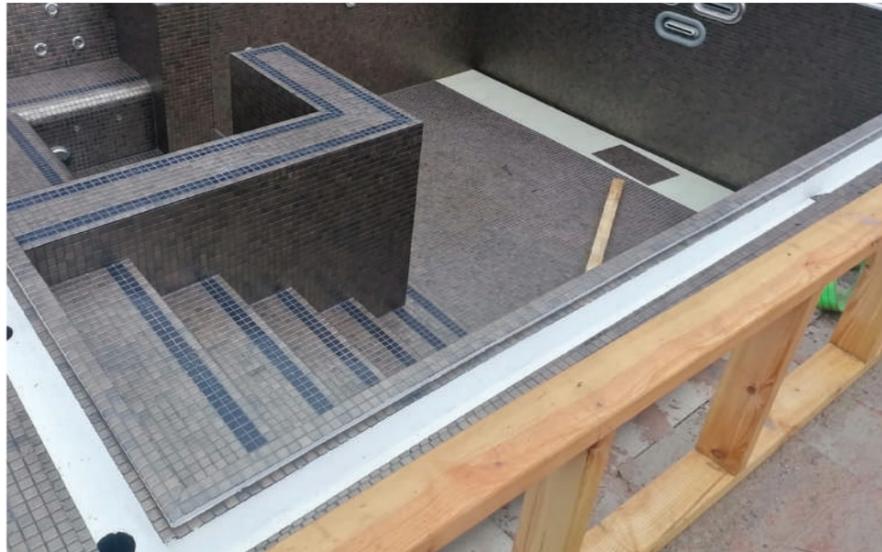

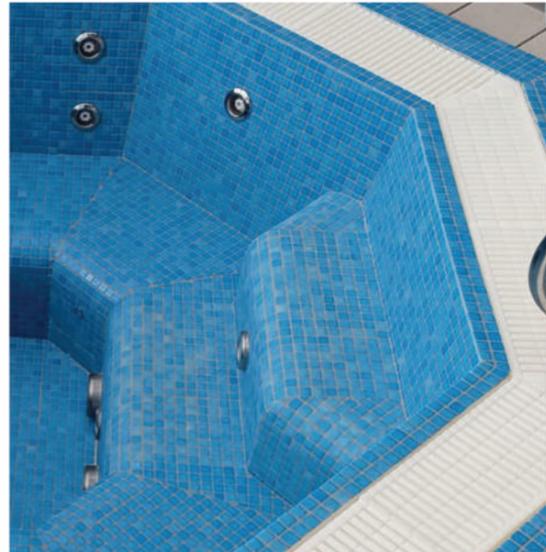

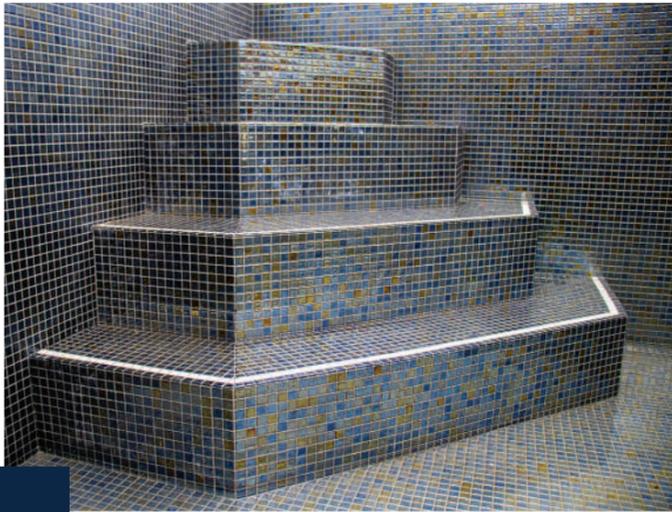

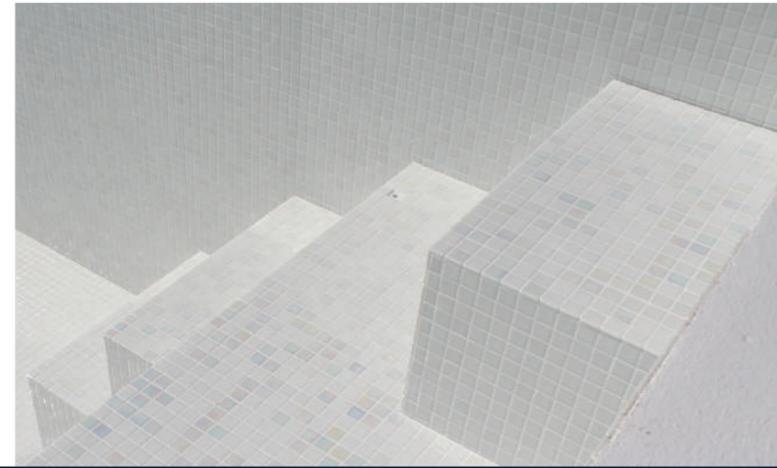

ADDITIONAL FEATURES

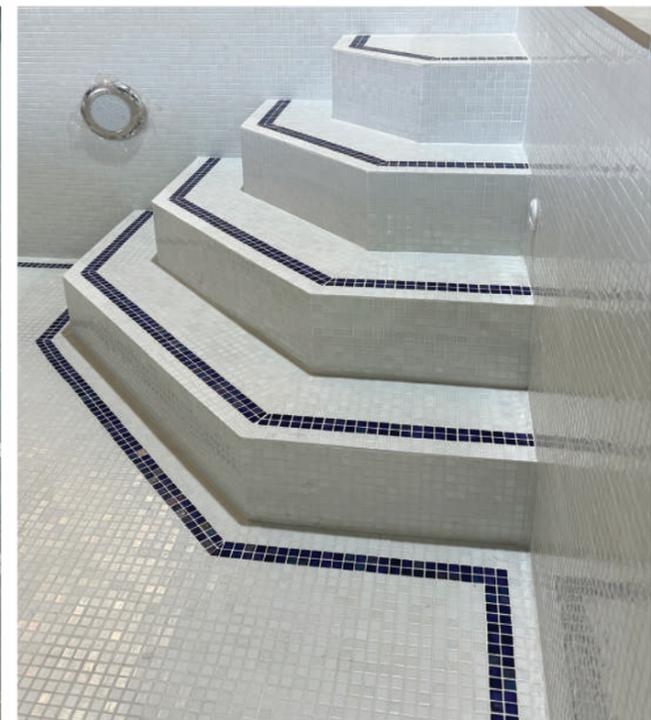

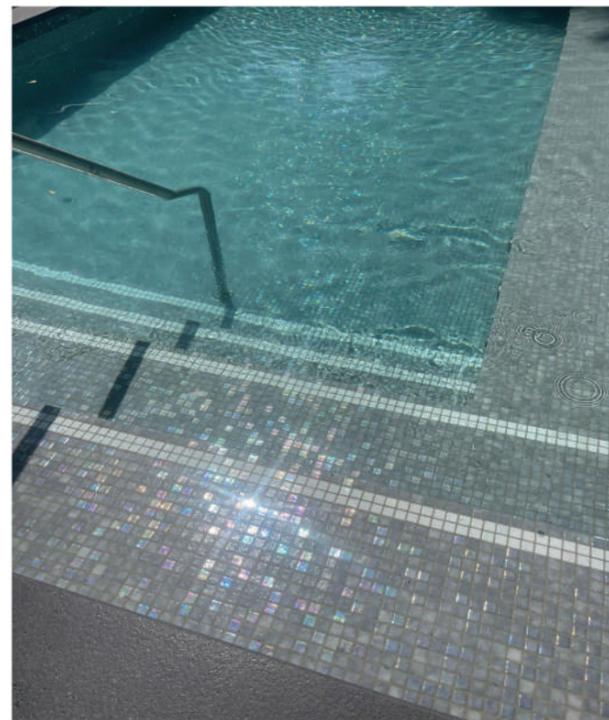

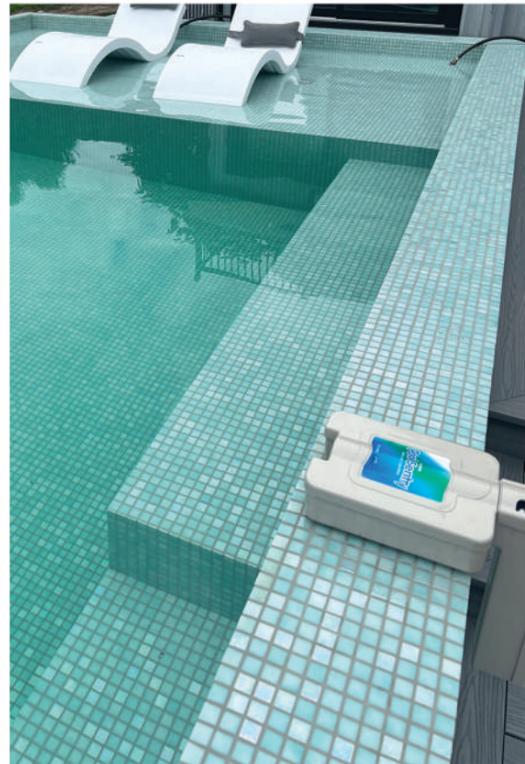

Our pools and spas can be customised in a number of ways to suit each customer. We offer demarcation tiles that highlight features like steps, seating areas, and loungers for added visibility and style. On request, our team can tailor the placement of massage and air jets to deliver a truly bespoke experience. To further elevate your installation, we offer a wide selection of water features, including water cannons and curtains.

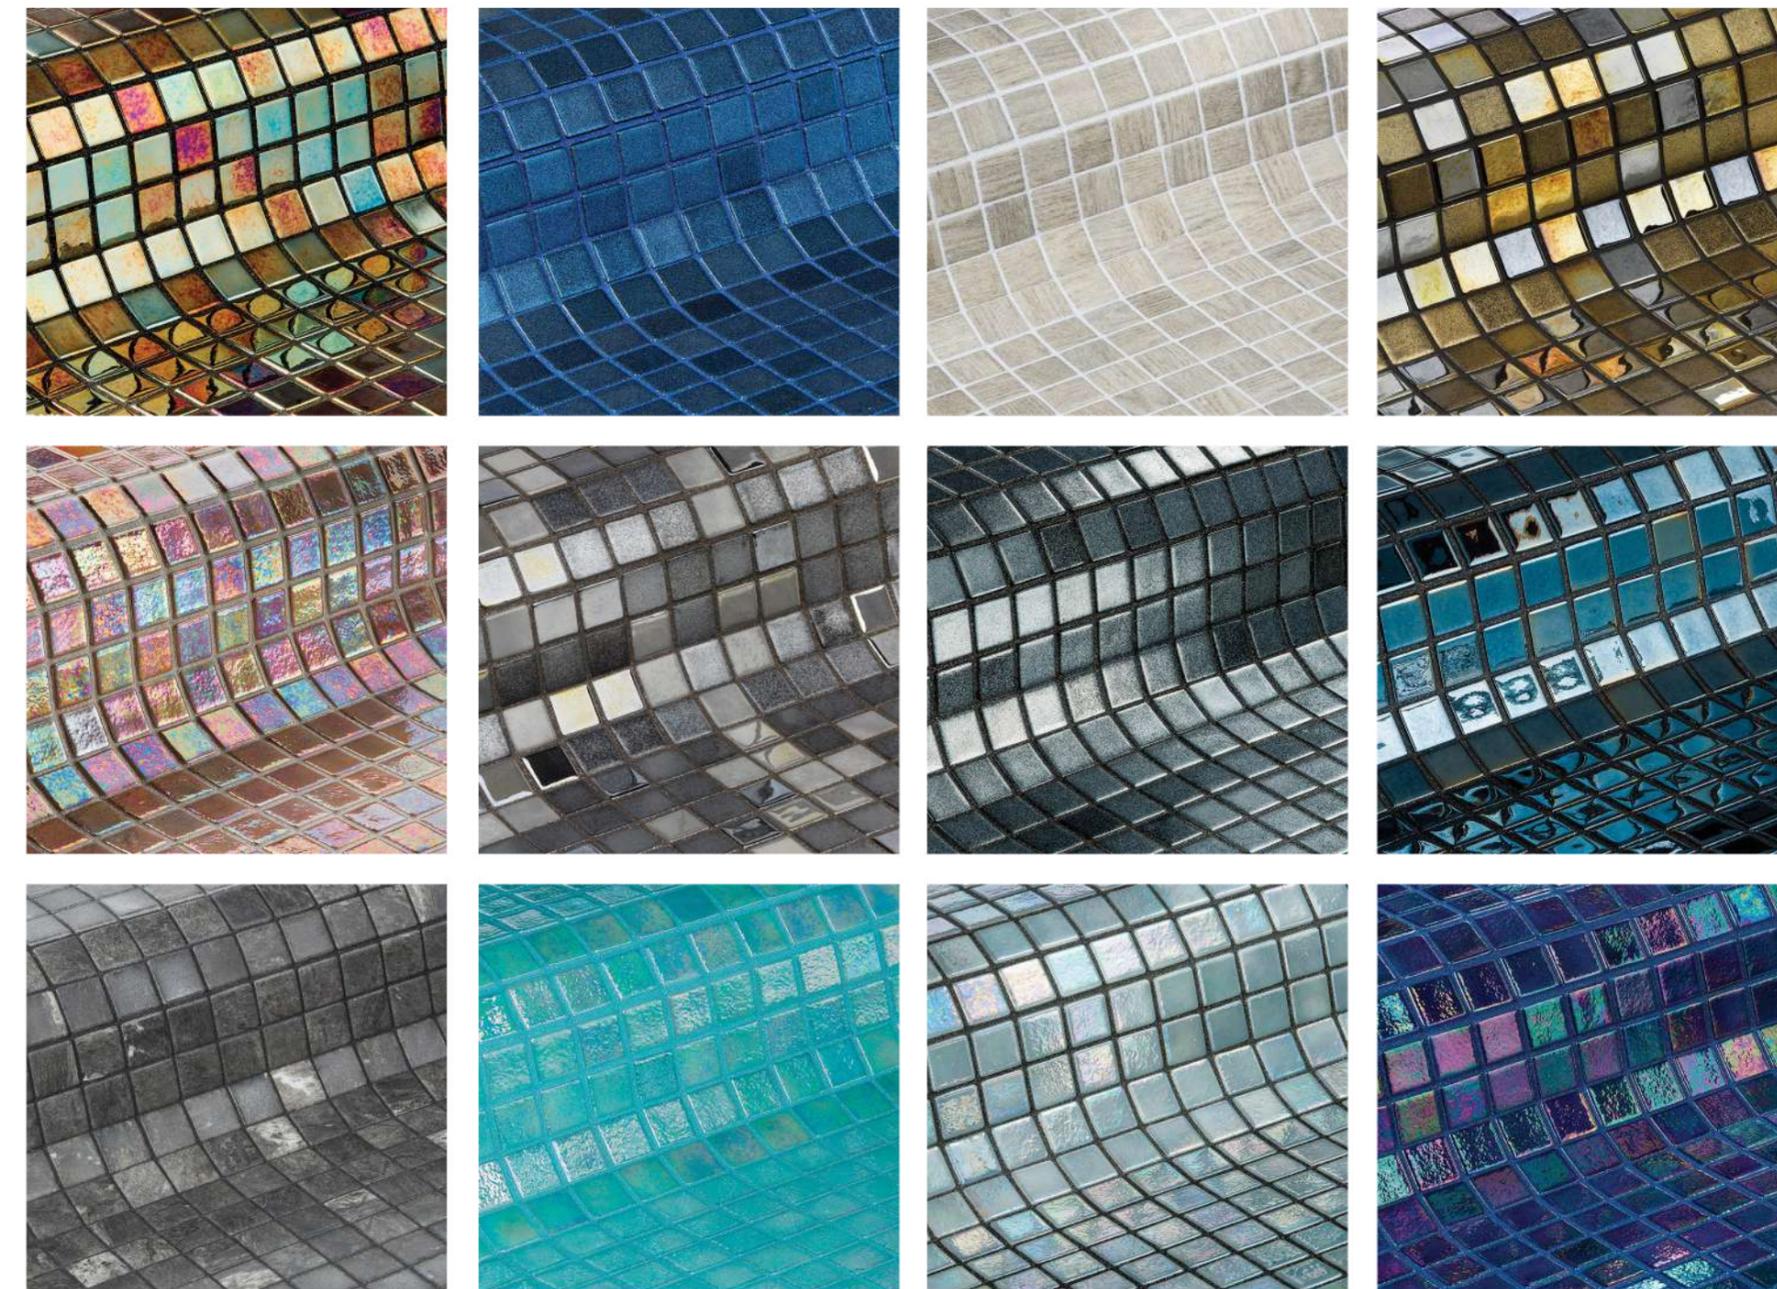

STEP CONFIGURATION

TILES OPTIONS

At Crystal Leisure, we provide an extensive selection of pool tiles, offering one of the most diverse ranges available on the market. Our wide variety of options allows you to create a truly unique and personalised pool or spa.

Across you will find a sample of tiles from our standard collection. We also offer a vast array of additional choices, including premium and large format tiles. We partner with a broad network of top-tier suppliers to ensure we can fulfil any tile requirement for your project, regardless of scale or specification.

POOL COVERS

The automatic, slatted pool covers are available for domestic and commercial pools, indoor or outdoor, and are versatile in the applications it offers.

STANDARD SLATTED COVER

Manufactured from durable PVC, our standard covers are engineered to significantly increase the insulation of your pool water and keep debris at bay. Suitable for both indoor and outdoor pools, these covers ensure your pool remains clean and thermally efficient.

White

Grey

PREMIUM SLATTED COVER

Upgrade to our premium slatted solar cover, made from advanced TRI-extrusion polycarbonate, to receive the following benefits:

- Solar Heating: Utilise solar energy to efficiently and sustainably heat your pool, significantly lowering energy costs while promoting eco-friendly pool maintenance.
- Water Conservation: Minimise water evaporation, helping save more water and maintain optimal pool levels.

COVER POSITIONING

The automatic covers can be positioned based on your step choice. For full width steps or a bench, the cover sits beneath them. For roman or corner steps, it can be placed behind the opposite wall in a cave or cover pit, without encroaching on the swimming area. Another option is a floor pit placement.
