### Standard configuration:

DIMENSIONS	227x 208x 230 cm
WEIGHT	950 kg
WINDOWS / GLAZING	Front side single glazing 8mm / transparent glass
DOOR	Aluminium frame, non-locking, single glazed, transparent glass,
FLOORING	HPL
INTERIOR WALLS	Rustic tyrol wood cladding, heat treated and brushed
BENCHES	Thermo aspen
BACKREST	Thermo aspen
CONTROL UNIT	Harvia Fenix wifi control panel
COLOR LIGHT THERAPY	LED RGB under the bench and behind the backrest incl. remote control
HEATER	Harvia Qubic 9kW black steel
FACADES	Glass, tyrol lamellas natural, sheet metal on the back side
RAINWATER DRAINAGE	Along the rear-side drip plate

### Available options:

GLAZING	Parsol dark grey, mirror
DOOR	Door lock, antipanic - EN179
FACADES	Tyrol lamellas black painted
HEATERS	Fin and Bio heaters from Harvia, EOS, or any other manufacturer by request
ILLUMINATION	Digital addressable LED interior illumination, outdoor ambient illumination below sauna, vertical LED stripes integrated in facade
IR HEATERS	Up to 3 pcs full spectrum heaters

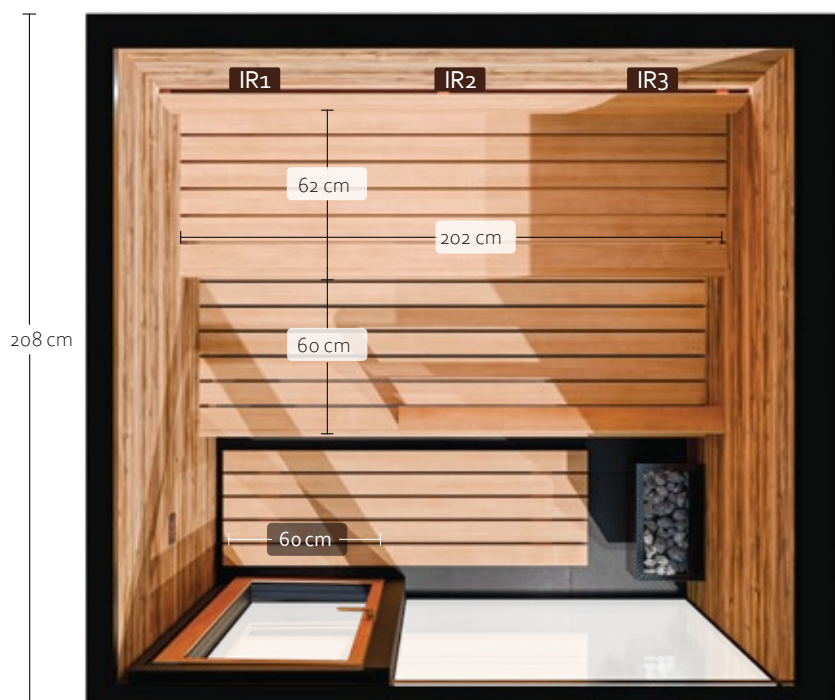

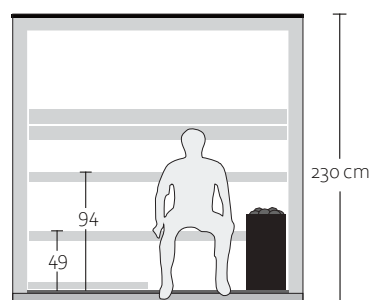

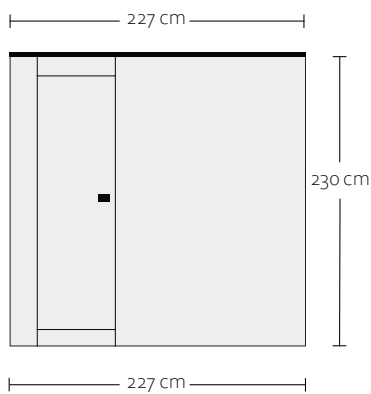

## Conditions to be provided by the customer:

**POWER CABLE:** 400 V / 5 x 2.5 mm<sup>2</sup> wire gauge, 3 x 16 Amp C-type fuse, 2 meter length, equipped with 400 volt 16A-6p-6h IP44 female connector. Your sauna will be supplied with the corresponding compatible connector, facilitating a hassle-free and secure electrical connection.

**FOUNDATION:** Flat and solid; a reinforced concrete slab, matching the dimensions of the sauna, with a thickness of 15 cm, the sauna is set on adjustable feet for leveling and alignment.

**INSTALLATION:** Accessibility to the installation site for crane delivery must be checked and ensured. **IMPORTANT:** It is the customer's responsibility to arrange for the crane or other delivery means and to clarify all requirements for installation in advance.

**DELIVERY & ASSEMBLY:** The sauna is prefabricated in the factory and is delivered directly to the construction site by prior arrangement. Generally, the customer is responsible for organizing all installation measures unless otherwise agreed. Final assembly, including electrical connection for testing, commissioning, functional testing, training, and handover will be carried out by the seller's or manufacturer's assembly team.

## Standard configuration:

DIMENSIONS	220 x 220 x 233 cm
WEIGHT	1300 kg
WINDOWS / GLAZING	3 sides, double glazed / mirror
DOOR	Aluminium frame, double glazed Door lock, antipanic - EN179
FLOORING	Tiles
INTERIOR WALLS	Rustic tyrol wood cladding, heat treated and brushed
BENCHES	Thermo aspen
BACKREST	Thermo aspen
CONTROL UNIT	Harvia Fenix wifi control panel
HEATER	Harvia Cilindro gkW black Steel
FACADES	Glass, sheet metal on the back side
RAINWATER DRAINAGE	Side wall-integrated concealed gutter with side water outlet

## Available options:

GLAZING	Parsol grey, parsol dark grey, mirror+ transparent
HEATERS	Fin and Bio heaters from Harvia, EOS, or any other manufacturer by request digital addressable LED interior
ILLUMINATION	illumination, outdoor ambient illumination below sauna
IR HEATERS	Up to 2 pcs full spectrum heaters
WINDOWS	Starry sky window

## Conditions to be provided by the customer:

**POWER CABLE:** 400 V / 5 x 2.5 mm<sup>2</sup> wire gauge, 3 x 16 Amp C-type fuse, 2 meter length , equipped with 400 volt 16A-6p-6h IP44 female connector. Your sauna will be supplied with the corresponding compatible connector, facilitating a hassle-free and secure electrical connection.

**FOUNDATION:** Flat and solid; a reinforced concrete slab, matching the dimensions of the sauna, with a thickness of 15 cm, the sauna is set on adjustable feet for leveling and alignment.

**INSTALLATION:** Accessibility to the installation site for crane delivery must be checked and ensured. **IMPORTANT:** It is the customer's responsibility to arrange for the crane or other delivery means and to clarify all requirements for installation in advance.

**DELIVERY & ASSEMBLY:** The sauna is prefabricated in the factory and is delivered directly to the construction site by prior arrangement. Generally, the customer is responsible for organizing all installation measures unless otherwise agreed. Final assembly, including electrical connection for testing, commissioning, functional testing, training, and handover will be carried out by the seller's or manufacturer's assembly team.
